FEDERAZIONE NAZIONALE IMPRESE ELETTROTECNICHE ED ELETTRONICHE

Federazione ANIE

Speaking for

ITALIAN ELECTRICAL ENGINEERING AND ELECTRONIC INDUSTRY

FEDERAZIONE NAZIONALE IMPRESE ELETTROTECNICHE ED ELETTRONICHE

Federazione ANIE

Speaking for

ITALIAN ELECTRICAL ENGINEERING AND ELECTRONIC INDUSTRY

AT THE HEART OF THE SYSTEM

ANIE has been representing the Italian electrical engineering and electronic industry within Confindustria since 1945.

With over **1,100 member companies** the Federation brings together strategic players from the industry in Italy, characterised by high levels of research and innovation that contribute to the Country's growth and success in international markets.

Through intense lobbying of national and EU institutions, **ANIE** and its Associations seek to encourage and strengthen entrepreneurial values, promoting the capacity for their development in pursuit of the general interest of the Country. **ANIE** cooperates with prestigious Italian and international technical bodies and plays a significant role within them.

ANIE is part of **Orgalim**, the European Engineering Industries Association

ANIE is a member of the main national standardization bodies (**CEI** and **UNI**)

ANIE contributes to the work of the European bodies (**CENELEC** and **CEN**) and international bodies (**IEC** and **ISO**)

ANIE is a founder member of **Prosiel** and **IMQ**, Italian Institute for Quality Mark, and is member of **METEL**

ANIE is also...

EDUCATION

THERE'S NO INNOVATION WITHOUT EDUCATION

The objective is to reduce the gap between the technical skills that the industry needs and the training that is being provided. This is why the mission of a technology industry focused on innovation and market challenges must be characterised by close dialogue with the education system and universities. This is the starting point for building the technological industry of tomorrow.

DIGITALIZATION

THE ENGINE OF THE EVOLUTION OF THE MANUFACTURING INDUSTRY

Combining digital technology and manufacturing is an important opportunity for the growth of our Country. The technologies that ANIE represents are strongly involved in the profound changes dictated by Industry 5.0. The electrical engineering and electronics sectors, of which ANIE is expression, are both the subject and object of this transformation and play a primary role in this challenge.

RESEARCH & INNOVATION

THE FUTURE IS ALREADY HERE

The technology industry has always been focused on innovation, making up over 30% of private Italian investment in R&D. Research & Innovation is fundamentally important for maintenance of the Country's competitiveness and safeguarding of manufacturing activities in the industries that ANIE represents.

ANIE is a dynamic organisation, the acknowledged representative of its stakeholders, who are influential in Italian and foreign infrastructure policy. Its objective is to contribute towards the development of the market for electrical engineering and electronic businesses, acting to ensure transparent rules. ANIE is a privileged meeting place for Member Companies, offering the chance of ongoing dialogue on the issues of greatest interest regarding company growth and competitiveness, with reference to the various factors of production.

ANIEFederazione

ELECTRICAL ENGINEERING

ANIE ENERGIA
Italian Energy Industry Association

POWER GENERATION

Power Plants and Components; Alternators; Generating Sets; UPS; Electrical Energy Storage Systems.

POWER TRANSMISSION & DISTRIBUTION

High Voltage Switchgears and Controlgears; High Voltage Substations; High Voltage Power Lines; Insulators and Insulating Materials; Fittings; Poles and Towers; Power Transformers; Medium Voltage Switchgears and Controlgears; Medium Voltage Switchboards; Instrument Transformers; MV/LV Substations; Protections Relays; Medium and Low Voltage Power Lines; Innovation of distributed networks (smart grid & microgrid); Distribution Transformers.

POWER SOLUTIONS FOR TRANSPORTS, INDUSTRY AND INFRASTRUCTURE

High Voltage Electric Motors and Drives; Low Voltage Electric Motors; Low Voltage Controlgears; Low Voltage Switchgears; Low Voltage Switchboards; Busbars; Power factor and industrial applications capacitors.

ANIE RETI
Italian Association for Energy, Transport and Communication Networks

ANIE Reti represents utility network companies operating in Italy in the fields of energy, transport and communication. Members of ANIE Reti are also manufacturers, distributors, installers of components and technology solutions for utility networks.

ANIE RINNOVABILI
Italian Renewable Energy Industry Association

RENEWABLE ENERGY

Manufacturers of components and/or turnkey power plants; O&M service Providers; Energy Management System Manufacturers and Service Providers; Power Producers in Italy and abroad in the renewable energy sector; Balancing Service Provider (BSP): Bioenergy, Wind, Photovoltaic, Geothermoelectric, Hydroelectric, Concentrated solar Power, Marine energy; Electrical Energy Storage Systems.

ASSIFER
Italian Railway Industry Association

ELECTRIFIED TRANSPORTS

Trains, locomotives, subway, tram (complete vehicles and related components); Signalling and Telecommunications Systems for railway; Electrification for rail power supply and traction; Railway Work Vehicles manufacturers and service.

ELECTRICALENGINEERING

AssoAscensori
Italian Lift and Escalator Association

LIFTS AND ESCALATORS

Design, manufacture of systems and/or their components, installation, servicing and repair of Lifts, Escalators and Moving Walks, Stair Lift systems and Home Lifts.

ASSIL
National Lighting Manufacturing Association

LIGHTING

Luminaires; Components for Luminaires and Lighting Systems; Lighting Sources and LED.

AICE
The Insulated Cable and
Wire Industry Association

CABLES

Low Voltage Power Cables; Medium Voltage Power Cables; High Voltage Power Cables; Accessories for Power Cables; Communication Cables; Winding Wires.

CSI
Italian Association for Components and Devices
for Electrical Installations

COMPONENTS AND DEVICES FOR ELECTRICAL INSTALLATIONS

Components for Electrical Installations; Protective Devices; Conduits; Household Intercom, Videointercom and CCTV; Controlled Mechanical Ventilation (CMV); Gas Detectors; Home and Building Automation; SPDSurge Protective Devices; Electric and Electronic Testing and measuring Instruments; Batteries (Automotive, Industrial and for Energy Storage Systems); Portable Batteries; Gas Static Smart Meters; Water Static Smart meters; Multi-service Gateway; Electric Vehicle charging infrastructure.

ELECTRONICS

ANIE COMPONENTI ELETTRONICI
Italian Electronic Components Association

ELECTRONIC COMPONENTS

Discrete Semiconductors; Integrated Semiconductors; Hybrid Circuits; Printed Circuits Boards; Capacitors; Resistors; Inductors; Connectors; Electronic and Electromechanical Micro Relays; other Electronic Components.

ANIE AUTOMAZIONE
Italian Factory and Process Automation Association

FACTORY AND PROCESS AUTOMATION

Variable speed drives; Components and technologies for interconnection and control (5G; Industrial Networking; OPC-UA; PLCs and I/Os; RFID; Industrial Wireless); Rotary encoder; Human machine interface; Gearmotors; Brushless Motors; Industrial PCs; Automation Panels; Safety; Vision Systems; Software; Remote control and automation systems for public utility networks; Intelligent transport systems; Mechatronics; Field Instrumentation; Flow measurement systems; Process control systems.

ANIE SICUREZZA
Italian Association for Security, Electronic Fire Safety and Building Automation

SECURITY, FIRE SAFETY AND BUILDING AUTOMATION

Security Systems (antintrusion; thief proof device; access control; VSS); Automatic Fire Detection Systems; Voice Alarm Systems; Building Automation Systems; Building Management and Security Services.

ANIE SIT
System integrators of Telecommunications

ITALIAN ASSOCIATION FOR SYSTEM INTEGRATORS OF TELECOMMUNICATIONS

ANIE SIT represents the companies involved in the design, construction and maintenance of fixed and radio mobile technological infrastructures for telecommunications and associated services. ANIE SIT companies represent an important part of the telecommunications chain and an interesting market segment consisting in large, medium and small companies competing in an integrated and sustainable environment. ANIE SIT companies are technology enablers and synergies developers among companies in other ANIE sectors that offer technological solutions in the final building, transport and energy market.

ASSIV
Italian Association for Surveillance and Security Services

SURVEILLANCE AND SECURITY SERVICES

Manned Guarding; Construction Security Corporate Security; Industrial Security; Retail Security; Event Security; Remote Monitoring; Key Holding; Mobile Patrol; Risk Assessment; Security Screening; Sub Contracting; Cash In Transit; Cash Handling; Aviation Security; Port And Maritime Security.

INDUSTRIAL PLANT ENGINEERING

ANIMP
Italian Association of Industrial Plant Engineering

ANIMP represents Engineering & Contracting companies, SME's that supply materials and services, installations and fittings, end-users, academics, experts and researchers. All of them are involved in designing and building industrial systems, large-scale projects and infrastructure.

TECHNOLOGICAL CONNECTION

ANIE PROVIDES ACROSS THE BOARD SUPPORT TO COMPANIES REGARDING THE CURRENT AND FUTURE CHALLENGES OF THE TECHNOLOGY INDUSTRY.

ENERGY EFFICIENCY

Energy efficiency is the intelligent use of energy, allowing performance that pays heed to environmental sustainability. Energy saving is today an absolute priority for industry, transport and domestic consumption. Energy efficiency is the prime objective of ANIE companies, the keystone for building a lower environmental impact economy, and an objective that may be achieved through full, across the board application of ANIE technologies.

NO WASTE BEING THE WATCHWORD

SMART GRIDS AND SMART CITIES

TECHNOLOGY ENABLING INTELLIGENT NETWORKS AND CITIES

The smart revolution applied to electrical grids and urban areas is born out of technological innovation. This is the fundamental driver in achieving sustainable urban transformation. Only with technological and innovative solutions supplied by the technology industry is it possible for there to be a practical implementation of more efficient and intelligent electrical grids, buildings, transport and communications systems. Convergence, interoperability and growing sustainability are the principal guidelines that are forging the new smart development model. ANIE technologies lie at the heart of the intelligence and efficiency that is changing the world that surrounds us, from infrastructure networks, through Building Systems to cities.

INTELLIGENT BUILDING

Intelligent Building is a system of integrated technologies enabling a new concept of the qualitatively and technologically advanced building. Intelligent buildings are a reality today thanks to ANIE technologies. Buildings are reinvented through integrated systems with the enabling and propulsive force of advanced technological installations. There is therefore a new approach to building infrastructure that looks to energy efficiency, sustainability, usability and security, in order to construct an advanced urban habitat, through open and integrated technology platforms.

IN THE INTELLIGENT BUILDING, TECHNOLOGY IS ON HOME GROUND

E-MOBILITY

E-mobility means sustainable mobility, in line with the European objectives for 2035. Mobility can only be made “greener” and more efficient with transport systems that use innovative technological solutions ever more pervasively. This is where ANIE technologies come in, leading the electronic revolution in transport systems through an integrated approach, from applications on board vehicles to EV recharging infrastructure.

GREEN FOR GO

MECHATRONICS

MECHATRONICS SPRINGS FROM ACROSS THE BOARD INNOVATION

On modern industrial production lines, mechanics and electronics interact in ever more integrated fashion in order to achieve greater process efficiency and promote industrial energy saving and sustainability. This is known as Mechatronics, a term that indicates the transverse nature of the technologies involved, and their ability to respond to trends that are continually changing. Mechatronics is a high potential “frontier” market.

SAFETY

Safety is the prevention of risk and the raising of qualitative standards, and at the same time encapsulates Safety & Security aspects. Demand for safety is on the rise, from transport systems to communication networks, from workplaces to shared spaces, as is likewise the technological offering that can provide it. The ANIE System provides for these technologies an integrated and convergent vision, in order to build a safer world, in industrial, residential, service-industry and geographical spaces.

INTEGRATED VISIONS OF A SAFE WORLD

RENEWABLE ENERGY

CLEAN, ZERO IMPACTENERGY

Renewable energy is clean and inexhaustible and does not deplete natural resources. Choosing sustainable energy production means allowing the Country to free itself from fossil fuel sources, promoting the development of a reduced environmental impact energy mix and raising the energy security. ANIE technologies allow development of a new energy balance, and integration of renewable sources and storage systems within the electricity system. ANIE’s actions are consistent with European objectives defined for 2030, and its investments are made with them in mind.
