

# Aker Process Systems becomes Fjords Processing

Prior to the demerger

After the demerger

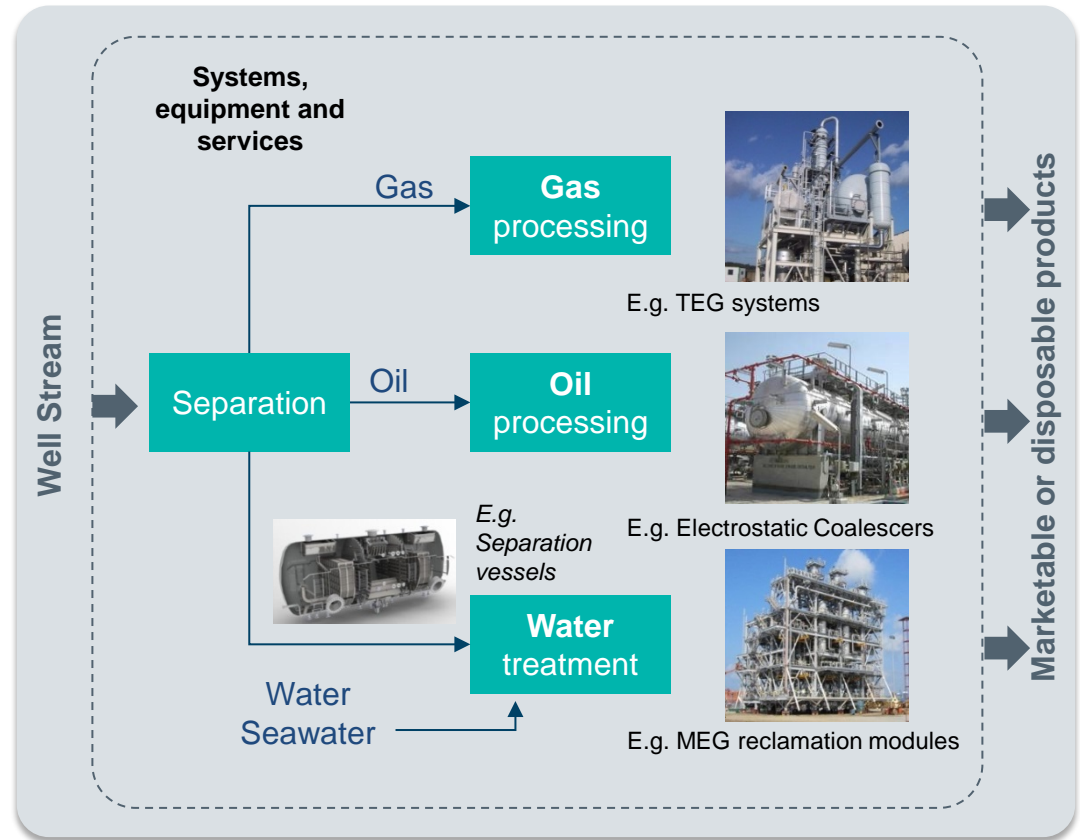

# More than 40 years of extensive experience

Over the last 40 years, we have grown through multiple acquisitions and organic growth to become a successful company with more than 600 employees – serving its customers in all major oil and gas markets around the globe.

# About Fjords Processing

- Provides world-class wellstream processing technology, systems and services to the upstream oil and gas industry
- ~300MUSD Revenue
- ~600 Employees, with presence in 15 countries
- Offers solutions across all oil, gas and water treatment segments with a product range including fluid stream separation, oil and gas processing, and water treatment
- Support and deliver solutions both to greenfield developments and brownfield operations
- Delivering both large EP / EPC projects requiring extensive project management and engineering, as well as standardized key equipment based on Fjords proprietary design

# Services

Fjords provide full aftermarket services on our installed base as well as extensive brownfield services such as plant diagnostic studies and revamp projects.

We also offer process system training programs for operators based on our detailed understanding of the applied technologies.

## Aftermarket

Boost the value of your field

- Commissioning and start-up
