# ADDRESS FROM THE AMBASSADOR OF ITALY TO THE U.A.E.

*It is a great pleasure for me to welcome you to the Italian Pavilion at Middle East Electricity 2016.*

*As the leading and longstanding event in the power industry for the entire Region, Middle East Electricity is a cornerstone for the electrical and electronic industry aimed at creating a strong business platform between local and international companies, supporting the very rapid growth in infrastructure projects as well as economic development currently taking place in this part of the world.*

*Let me state with confidence and pride that Italy is part and parcel of this success story. Our companies are among the most important trading partners of the United Arab Emirates. Italy's exports of electrical and electronic products are worth more than 600 million euros per year and constantly growing. As this event clearly shows, Italy enjoys such a wide spectrum of specialized companies and products offering highly innovative and tailor-made solutions to satisfy all possible customers' needs. This is the result of unique technological know-how, due to highly intensive investment in Research and Development, intertwined with creative ideas and flexible production techniques. Furthermore, great emphasis is put on sustainability, as the efficient and smart use of energy resources is a key element to ensure productivity and competitiveness.*

*I am pretty sure that this year the exhibition will offer an even greater opportunity than the past to showcase new projects and achievements and it will represent a great chance to foster long term cooperation between local and Italian companies with the objective of creating mutual benefits and stable partnerships also in light of Dubai's efforts to organize a world class Expo in 2020. In this respect, the Italian entrepreneurial community is eager and keen to offer its products and skills to bring added value for the success of this event. The Embassy of Italy to the UAE, along with the Italian Trade Agency and ANIE stand firm in supporting the official participation of Italian companies in Middle East Electricity 2016, as well as in Solar Middle East, wishing all exhibitors and visitors best success for their business endeavors and objectives.*

*A final word that this place sincerely deserves: less than one year in office in the UAE has confirmed my belief that there is something more powerful than electricity: it is called will, enthusiasm, real ingredients for the electricity of life. Therefore, I am so glad to say that Italy and UAE share today the same willingness to add more and more vibrant light to their already excellent partnership!*

  
**Liborio Stellino,**  
Ambassador of Italy to the UAE

# LETTER FROM THE ANIE VICE PRESIDENT FOR INTERNATIONALIZATION

*This is the fifth year that Federazione ANIE supports, in collaboration with the Italian Trade Agency, the national official participation at Middle East Electricity 2016, the leading exhibition in the Middle East region for power production, transmission and distribution technologies.*

*The Italian Electrical Engineering and Electronic Industry represented by ANIE is a driver of innovation in strategic sectors such as energy, building, industry and transport. With a global turnover of 55 billion euros in 2015, over 30 billion euros in export and more than 400,000 employees, Italian companies supply advanced technologies for private and public infrastructures, leading to better, greener and more customized products.*

*Italy comes from the success of EXPO 2015. Now our country passes the baton to the next Universal Exposition to be held in Dubai in 2020.*

***Connecting Minds, Creating the Future.** The debate on the future of food will go to the one on **Opportunity, Mobility and Sustainability**, the subthemes of EXPO 2020. In this framework technologies play a key role and the participation at Middle East Electricity 2016 represents a great opportunity for Italian companies to promote the excellence in their manufacturing experience.*

**Andrea Maspero**

ANIE Vice President for Internationalization

## ITALIAN TRADE AGENCY

Sheikh Zayed Road - Dubai Internet City - ARENCO Tower, Office 506  
500088 Dubai, U.A.E. - Tel. +971 4 4345280 - Fax +971 4 4220983  
dubai@ice.it - www.ice.gov.it - www.italtrade.com

*The Italian Trade Agency is the Government agency which promotes the globalization of Italian firms, under the aegis of the Ministry of Economic Development, in collaboration with the Ministry of Foreign Affairs.*

*ITA helps to develop, facilitate and promote Italian economic and trade relations with foreign Countries, focusing on the needs of SMEs, their associations and partnerships.*

*ITA sustains Italian firms in their internationalization process, promoting the marketing of Italian goods and services as well as the image of "Made in Italy" products around the world, while facilitating outward Italian investments and encouraging FDI attraction into Italy.*

*ITA provides information, support and consultancy services to Italian companies on foreign markets, in order to foster exports and economic cooperation in all sectors, with the objective of increasing the effectiveness of their presence on international markets.*

*ITA works closely with the Italian Regions, the network of Italian Chambers of Commerce, business organizations and other public and private entities.*

*ITA's headquarters are based in Rome and it works through a large network of offices around the world which are acknowledged as "Trade Promotion Offices or Sections" of Italy's Embassies or Consulates.*

*Federazione ANIE is a Confindustria member representing the Electrical Engineering and Electronic companies operating in Italy. ANIE is an active and recognised interlocutor of the stakeholders who influences framework policies in Italy and abroad and offers to Member Companies a platform where they can confront with a whole community of industries.*

**ANIE, with over 1,200 Member Companies, represents the following industrial sectors:** Power Production, Power Transmission and Power Distribution, Electrified Transports, Lifts and Escalators, Lighting, Cables, Components and Devices for Electrical Installation, Household Appliances and Catering Equipment, Electronic Components, Factory and Process Automation, Security, Fire Safety and Building Automation.

### **ANIE industry in figures for 2015:**

- ▶ 55 billions Euros in Turnover
- ▶ 30 billions Euros in Export
- ▶ 410,000 employees
- ▶ 4% intra-mural R&D Expenditure on total Turnover

Complete range of explosion proof electrical equipment in light alloy, cast iron and stainless steel

Tailor made explosion proof switchrack and panel boards

Since 1950 **A.D. VIGANÒ** has been manufacturing a complete range of explosion proof electrical equipments for hazardous areas, where presence of gas or inflammable dust can create explosive atmosphere. The equipment are classified according to their protection degree as flameproof enclosures Ex-d (surface group II mine group I), increased safety Ex-e, intrinsic safety Ex-i, pressurized apparatus Ex-p. The products are built according to ATEX, IECEx, TR-CU. A.D. Viganò has obtained ISO 9001 quality certification.

### Products:

product range used in chemical and petrochemical industries, enclosures, junction box, panels, control station, switches, sockets and plugs, lighting fixtures, accessories manufactured in aluminum, stainless steel, cast iron.

**AB TRASMISSIONI S.r.l.**

Coupling with spacer

Digital LED-bar instrument

Established in 1975 with the name of AB BALBONI, **AB TRASMISSIONI** is a solid and recognized family-run company that strives to meet its customers needs as well as to improve itself.

For 40 years AB TRASMISSIONI has been known for its wide range of products and, with its flexible and rigid couplings and coupling systems, can meet the requirements of power transmission in the most varied applications for the motor field, for agriculture, irrigation, energy production and mechanics in general.

With the aim of being a partner for its clients, AB TRASMISSIONI has developed a wide range of products and accessories for industrial engines and recently has taken over the production of the company ELEBERG already well-known for its electric products of measurement and control.

**Products:**

solenoids, electric pistons, electric valves, heaters, digital LED-bar instruments, digital instruments current transformers, isolation control.

**ADEL SYSTEM S.r.l.**

**AEC INTERNATIONAL** always creating and developing innovative and up-to-date products, is leader in Power Management Technology. Since 1997 in Italy, part of ALLIS Group, present in 57 Countries, AEC has grown thanks to the excellence and quality achieved in all products manufactured in Italy, Taiwan, China and USA. Stock listed from 1994 in Taipei stock exchange, AEC is certified ISO 9001, 14001 and 18001. AEC is a long term reliable partner for distributors, resellers and customers. AEC has more than 600 employees (50 engineers in R&D departments) and a consolidate turnover of 120 millions USD in 2014. AEC products portfolio includes: UPS systems, Rectifiers, Inverters, PV products, Battery Chargers, T&D apparatus, Switchgears, Dry type Transformers, Scada and Chargers for Railways and Subways. AEC provides worldwide after sales support with technicians located in all continents.

**Products:**

uninterruptible power supply from 500 VA up to 800 kVA, switchgears, rectifiers for telecommunications photovoltaic inverters and panels, transmission and distribution apparatus, battery chargers.

Containerized gensets for standby, continuous or parallel operation

Hybrid gensets with solar energy integration

**AUSONIA** is an Italian company active in the Power Generation field since 1932, offering a wide range of AC GENSETS up to 3000 kVA, available in different configurations. Thanks to its skilled team of engineers, AUSONIA is able to design fully customized solutions specifically focused on very critical applications (Oil&Gas, Mining, Defense, Telecom, etc.). Hybrids & High efficiency DC solutions are also available.

### Products:

AC diesel generators in single, dual or parallel mode up to 3000 kVA, diesel or natural gas power plants, mobile generators on trailer/truck, high efficiency DC solutions, hybrid systems, no-break power systems (rotary UPS), cogeneration and tri-generation power plants.

BS 7629-1/2008, BS 5839-1

CU/MGT/XLPE/OSCR/LSZH/SWA/LSZH

Born in 1987, **BERICA CAVI GROUP** is today one of the leading companies in Europe in the production of special cables, in the field of security, signaling, command and control, instrumentation and on specific customers requests. From 2005 the company begins to acquire the most important marks for special cables. In 2013 Berica Cavi, in order to support the market expansion abroad, acquires some well-known marks such as LPCB and others, and incorporates Fabbrica Trentina Conduttori (FCT), a company specialized in the production of cables required in 40 different foreign Countries, which becomes brand of Berica Cavi Group property.

The company's main strengths are: product quality; use of raw materials of first choice; wide range of variations in building of customized cables: section, number of conductors, flexibility, insulation materials, shielding, armour, sheath materials; prompt answer and delivery; technical advice service directly to the end user; research, development of new products; many cables on stock for prompt delivery.

### Products:

special cables including security, fire resistant, CCTV and coaxial, solar, shielded and armoured, high and low temperature, instrumentation cables and fiber optics, most of them certified, plus any kind of OEM cables marked following the customers requirements.

Cam switches, a wide range from 12 up to 630 amperes      DC disconnect switches for solar applications

**BREMAS ERSCE** is a major player in the design, manufacturing and marketing of electromechanical components for the industrial automation and the solar industry, with a complete range of cam switches, AC and DC disconnect switches, limit switches, safety switches, pushbuttons and relay sockets able to satisfy the most different fields of application. With over 50 years of experience, Bremas Ersce is a specialist in the industrial sector for standard and custom products.

**Products:**

Cam switches: a wide range of diagrams from 12 up to 630 Amperes.

AC disconnect switches: from 20 up to 1600 Amperes.

DC disconnect switches for solar applications: from 12 up to 50 Amperes, 1000 VDC.

Limit and safety switches: a broad range of actuators suitable for multiple applications.

**CARLO GAVAZZI** is an international group active in designing, manufacturing and marketing electronic equipment. Automation Components is the core business operated by Carlo Gavazzi Group.

Automation Components designs and manufactures electronic control components for the global building and industrial automation markets in its ISO 9001 certified factories in Italy, Lithuania, Malta and China.

The products are marketed across Europe, North America and Asia-Pacific through a network of 22 own sales companies and around 60 independent national distributors. In addition, Automation Components designs and manufactures signaling equipment and safety relays for the railways market.

### Products:

sensors, monitoring relays, timers, energy management systems, solid state relays, electronic motor controllers, safety devices and fieldbus systems provide automation solutions for the industrial and building automation markets.

**CEMBRE** is the leading Italian manufacturer and one of the largest European manufacturers of electrical terminations and cable accessories, related installation tools, cable glands and accessories, products for the railway industry, identification & labelling systems. The main production unit is placed in Brescia and a smaller one is placed in Birmingham (UK). Other five sister companies are purely sales-focused, and are located in Paris, Madrid, Oslo, Munich and Edison, New Jersey (USA).

**Products:**

insulated and uninsulated terminals, cable lugs, mechanical and hydraulic tools, identification and labelling system products, cable glands.

CO.SI.ME. S.r.l.

**CO.SI.ME.**, established in 1965, manufactures explosion proof equipment and components for 30 years. The success of the company is based on strong roots. CO.SI.ME. is an old and modern company, deriving its strength and driving force from this. Headquarter, commercial office and factory are located in Milan, in the North of Italy. CO.SI.ME. winning formula has always been progress and innovation, superlative performance and intense motivation to be the market leader, that takes a great deal of ambition and vision. The company wants to inspire its customers for their products and services through technology, perfection and service. Due to the continuous efforts and investments in its internal laboratory with the combination of undisputed skills acquired in the field since many years of activity, CO.SI.ME. is an excellent example of Made in Italy in the world. CO.SI.ME. has the independence to be able to follow long-terms company goals.

### Products:

explosion proof lighting fixtures, panels, push buttons, acoustic devices, cable glands, sockets and fittings.

Solutions for MV applications

Automatic powerfactor correction for LV applications

**COMAR CONDENSATORI**, established in 1968, is a leading company concerning design and development of a wide range of Capacitors and where Capacitors are in the main part especially to save electrical energy.

COMAR produces single and three phase Capacitors for LV and MV applications, PF Regulators, filter reactors and a wide range of Automatic Cabinets included "detuned" type. COMAR has experience in harmonics reduction by Passive and Active Filter systems. COMAR produces: AC/DC Filter, Damping and RC protection Capacitors. COMAR has a complete range for motor drivers, run and lighting Capacitors both in plastic and metal case. COMAR has QSE Quality Integrated System Certified ISO 9001, 14001 and OHSAS 18001 and products approved with the Technical Standard by IMQ, VDE, C-UL-US and KEMA.

### **Products:**

lighting and motor capacitors, three-phase capacitors, racks, P.F. regulators, reactors, P.F. correction equipment for LV and MV application, active and passive filters for harmonics reduction.

EGI products

Power terminals

**EGI** is the Italian company leader in Europe in manufacturing terminals and lugs with the largest and most complete range of products, with wire range from 0,25 up to 1.000 mm<sup>2</sup>. All productive process is performed within EGI factory, and this enable the company to produce, in addition to standard products, any kind of articles on request in short time and with low costs. Beside quality EGI adds innovative products to solve every kind of electric connection matters.

Quality, innovation and efficiency make EGI leading company in the electrical sector.

**Products:**

pre-insulated and not insulated terminals from 0,25 to 6 mm<sup>2</sup>, power terminals from 1,5 to 1.000 mm<sup>2</sup>, insulated and not insulated end ferrules from 0,25 to 150 mm<sup>2</sup>, connectors, insulating sleeves from 1,5 to 1.000 mm<sup>2</sup> in 9 colours, cable glands and cable clamps, cable ties, crimping tools.

ETM series thyristor module  
for dynamic power factor correction

SSR15 series solid state relays

The **EL.CO.** company opened its doors for business in 1986, developing its own static relays with various power ratings, linear power supply units and switching gear, interfaces as well as analogue and digital temperature controllers. All company products are CE certified and the static relays have also acquired the VDE and the UL/CSA marks. The company has adequate productive equipment acquired to keep pace with the development in the sector. Thanks to its years of experience, the EL.CO. customer portfolio has leading accounts and the company is actively involved in both the national and foreign markets.

### Products:

SSR15 new series solid state relays, ETM new series thyristor module for dynamic power factor correction.

Transformer in its protection box

ELCA range of products

**ELCA** is one of the leading Italian companies producing transformers, autotransformers and chokes, single and three phase, dry-type, low voltage. Established in 1970, ELCA follows the goal of a wider and wider range of products, by giving great importance to the quality. That's the reason why the company has reached important results in terms of certificates: ISO 9001:2000, CE mark, UL/CSA homologation and UL/CSA insulation system homologation. Moreover, with attention to Arabic Countries, it has obtained SASO Certification issued by TUV. The company is specialized in the production of items, by following detailed technical drawings and satisfying all particular needs of customers. ELCA is involved in different fields, like automation, packaging, elevator, photovoltaic and lighting.

### Products:

transformers, single and three phase / autotransformers, single and three phase / chokes, single and three phase.

LV and MV power cable accessories of different technologies, as e.g. heat-shrinkable, cold-shrinkable, pre-molded, resin and tape based solutions

Components for applications on LV and MV power cables, as e.g. heat-shrinkable sleeves and molded parts, mastics, tapes, resins, cold-shrink tubes and components

**ELCON MEGARAD** is the Italian company that designs, produces, tests and markets power cable accessories and components for electrical networks worldwide. Its Research and Development department is ceaselessly active in developing innovative materials and technologies. Its laboratories for materials characterization and high voltage testing support the design of a comprehensive range of joints and terminations for all types of cables on the market, according to CENELEC, IEC, IEEE, and ASTM standards. Elcon Megarad is certified ISO 9001 and ISO 14001.

### Products:

heat shrinkable joints and terminations, cold shrinkable joints and terminations, resin joints and terminations, cable connectors and porcelain terminations, joints and terminations for special applications, as e.g. renewable energies and wind farms.

**FRER** was founded in 1980 with the aim to manufacture high level reliability measuring electrical instruments and accessories to be used in distribution and control switchboards. Since its foundation, Frer has been able to evolve and grow constantly thanks to its dynamic and enterprising workmanship.

The wide 30 years market experience permits Frer to offer:

- › Complete measuring instruments range
- › Fast deliveries
- › Homologation and Vendor List
- › Sales representatives and Distributors
- › International Certifications

**Products:**

network analysers, transducers, energy meters, earth leakage relays, current transformers, analog panel meters.

GRUPPO ENERGIA products

**GRUPPO ENERGIA** is a dynamic Italian company specialized in manufacturing electric capacitors with applications in the following fields:

- › single and three phase induction motor run capacitors
- › lighting capacitors for fluorescent and high pressure mercury vapour lamps
- › power factor correction capacitors for LV and MV
- › power electronic capacitors
- › power factor regulators & capacitor duty contactors

Gruppo Energia comes to the market with its strong range of products, providing customized solutions in order to satisfy all the customer's needs.

Quality, reliability and competence are ingrained in the company spirit, guaranteeing optimum organization, a flexible production process and rigorous systems to control the set targets.

**Products:**

power factor correction capacitors and components for LV and MV, motor and lighting capacitors, power electronics capacitors, power factor correction banks.

LV and MV Fuses and Fuse holders

**ITALWEBER** is an italian producer of high quality components for electrical protection since 1960. Our production is focused on Fuses and Fuse Holders for Low Voltage, Medium Voltage and Photovoltaic applications, according to European and international standards, Cabinets and components for Photovoltaic plants, Motor Protectors, Insulators, Flexible Copper Bars, Thermoplastic Enclosures, Low Voltage and Medium voltage Transformers with approvals, Surge protective devices, Cam Switches and Control Switches.

### Products:

fuses and fuse holders, low voltage and medium voltage transformers, cams switches and control switches, protection components for photovoltaic application.

Side of a 300MW Gas Turbine

Insulation pillows for 70MW gas turbines

**KLEVERS ITALIANA** is specialized in thermal and acoustic insulation for Gas&Steam Turbines and all industrial machines. Klevers Italiana produces certified fire protection enclosure systems for actuators. Our company undertakes turn-key projects from design, based on thermal and noise calculations; 3D modeling, eventually on the re-built model of equipment by the mean of 3D-scanner, technique of reverse engineering; production and installation worldwide of our products, all with internal assets.

**Products:**

insulation pillows for steam and gas turbines, sound absorption pillows for gas turbines exhaust systems, thermal and acoustic insulation for compressors and steam turbines, fire protection for adaptors, valves, switchboards and cryogenic tanks, sparkling shields for welders, fire blanket, all insulation materials ranging from temperatures - 90°C to 160°C.

KME MICO® Mineral Insulated Cables full range

KME MICO® industrial application in industrial Ex area

**KME GROUP** is european leader in copper and copper alloy semifinished products (rolled, tubes, rods). KME Italy produces Mico® mineral insulated copper sheathed cable, the most performant fire resistant cable for fire detection and emergency systems. Fire resistance performances lead this cable inside specifications in Oil&Gas plants, new buildings for power and signal distribution.

### Products:

MICO® mineral insulated cable - light duty cables (300/500 V) for signal, MICO® mineral insulated cable - twisted cables (300/500 V) for fire alarm and bus system, MICO® mineral insulated cable - heavy duty cables (450/750 V) for power, accessories for mineral insulated cable - seals, industrial and ex glands, fixing systems and tools, brass and copper junction boxes.

LINERGY products

**LINERGY** is an Italian company that designs, manufactures and markets solutions for emergency lighting for high-tech applications in civil and industrial fields. Linergy is equipped with an internal R&D department, where a team of technicians and engineers work to design and shape products and solutions in full compliance with the regulations. For proper management and maintenance of higher entities, Linergy offers a number of centralized monitoring systems and battery systems for centralized emergency lighting and standard LED. Each system can be customized according to the specifications of the project and through graphics visualization software they can be managed and remotely controlled.

**Products:**

centralized supervision systems, LED technology emergency lighting, signaling luminaires, fluorescent emergency lighting, emergency kit, halogen emergency luminaires.

LOVATO Electric (Factory in Bergamo, Italy)

For over 90 years, **LOVATO ELECTRIC** has been designing and manufacturing low voltage electrical devices for industrial applications. Founded in 1922 in Bergamo (Italy), LOVATO ELECTRIC is a privately owned company, and has been managed by the same family of entrepreneurs for 4 generations.

LOVATO ELECTRIC has a range of over 10,000 products that comply with the strictest requirements of international standards.

To provide competitive products and services in the industrial automation and energy management fields is our company's "mission". Our 13 branches abroad and a network of over 90 importers ensure the availability of LOVATO ELECTRIC products in more than 100 Countries all over the world.

LOVATO ELECTRIC Products

### Products:

motor control and protection, control and signalling, circuit protection and isolation, automation and control, energy management.

**METH S.a.S.**

Single Phase transformer

Three Phase transformer

**METH** has been designing and manufacturing electric transformers since 1980 focusing on the quality of its product performance, thanks to 30 years of experience in this business. Since 1998 multiple national and international certifications have been the result of a continuous effort in updating the products to meet worldwide standards and requirements, such as UL, KEMA, ENEC, GL and RINA.

Meth is specialized in manufacturing single-phase electric transformers from 3,2 VA to 80 kVA, three-phase electric transformers from 100 VA to 800 kVA, for applications in different fields from industrial to automation to photovoltaic to marine and three-phase filter and smoothing reactors. Meth experience and technology allow to develop and manufacture in a short time new products to meet any customers' requests and to improve new products programs.

**Products:**

low-voltage single-phase isolating and safety transformers, single-phase transformers for medical locations, single-phase for marine applications, PCB transformers, low-voltage three-phase transformers with protection degree: IP00, IP21, IP23, IP54, IP55, low-losses three-phase slim-line transformers eco-design, three-phase autotransformers, three-phase filter reactors, three-phase smoothing reactors.

Bolt Locks

Key Exchange Box

Brand **AREL®** has been active since 1965 in the production of Safety Interlocking Devices for MV/HV electrical systems. The concept of safety system includes the set of actions used to minimise the risk of damage to property or individuals. As an essential factor for MV/HV electrical installations, interlock system is designed to prevent incorrect operations that could cause injury to individuals or damage equipment. The quality of brand products AREL® has made the company a trusted partner for numerous renowned companies in the Energy, Railway and Navy sectors.

### Products:

safety interlocking devices (bolt locks - key exchange boxes - door locks - electromechanical locks key switches), camlocks and handles.

Multi Power, the ultimate modular UPS for Datacentre

Sentinel Dual, best solution for mission critical applications

**RIELLO UPS** is ranked among the top 4 worldwide manufacturers of uninterruptible power supplies and standby power systems. Deployed in a number of mission-critical environments (from desktops to datacentre) where an exceptional level of resilience and reliability is required, Riello UPS delivers reliable power, designed and manufactured in Italy. Riello UPS business includes 2 production sites in Italy, 20 subsidiary in Europe and a capillary presence in more than 80 Countries of the world.

### Products:

UPS: a complete range of single phase and three phase UPS from 400 VA to 6.4 MVA, for applications ranging from home offices to large industrial plants to datacentre.

Modular UPS: modular UPS system based on hot-swappable 42 kW modules, for maximum flexibility, minimum MTTR, 'buy-as-you-grow' approach.

Solar inverters: AROS solar technology, the renewable energy division, provides coverage of every need, from small domestic systems of just a few kilowatts to solar power plants with several megawatts.

Cast resin transformers production plant

Power transformer

**SEA** is one of the world's leading manufacturers of dry-type, cast resin, liquid filled transformers, reactors and coils. A wide range of high quality expertise addressed to utilities, OEM's, EPC's needs and standard distribution purposes field. Furthermore SEA offers customized solutions suitable for Oil&Gas, mining, metal industry, civil, transport (traction, marine, etc.) and renewable/non-renewable energy sources sectors. The company enjoyed brand recognition thanks to its sales worldwide from 1959.

### Products:

small and medium oil distribution transformers up to 30 MVA, oil power transformers up to 180 MVA dry-type transformers up to 25 MVA, cast resin transformers up to 30 MVA, rectifier and converter transformers for 6-12-18-24-36 pulse applications, furnace transformers, autotransformers, mobile substation transformers, stepless and regulated by steps arc-suppression coils, earthing transformers (neutral couplers), fixed or variable shunt reactors, series reactors (current limiting, neutral earthing reactors), reactors for special applications (filter tuning r., damping r., smoothing r., etc.).

L 13/40 230 ff 4 is a four poles assembled and ready to install, voltage limiting type surge arrester for three-phase plus neutral 400 V systems. Typical locations in Main Distribution Boards (MDB) or at the origin of low voltage systems

L 10/60 PV Y ff is a voltage limiting type surge arrester for photovoltaic systems. Typical locations on the DC side close to the PV inverter, on the PV generator and in the junction box

For almost 30 years **ZOTUP** has been committed to develop and produce surge protection solutions with passion. Nowadays it continues to provide products and services characterized by high quality standards.

In ZOTUP values are simple:

- **SAFETY:** ZOTUP produces products with the unique intention to protect people, their property and their work;
- **QUALITY:** only through the products quality ZOTUP accomplishes what it promises;
- **INNOVATION:** the continuous development is the lifeblood of ZOTUP.

The development generates innovation, the real answer to customer needs.

### **Products:**

surge protective devices for low, medium and high voltage, surge protection for PV plant, wind turbine, data center and LED lighting.
