ITALIAN TRADE AGENCY (ITA)

The Italian Trade Agency-ITA, established in 1926, is the Governmental Agency which supports the internationalization of Italian companies, in the framework of guidelines and strategies conceived by the Ministry of Economic Development.

The Headquarters is located in Rome and ITA operates worldwide through a large network of Trade Promotion Offices (65 branch offices, Trade Promotion Offices of the Italian Embassies.)

ITA provides a wide range of services, helping Italian and foreign businesses to connect with each other such as: market research, information about laws, rules, regulations, custom duties, identification of potential business counterparts, bilateral meetings, trade delegation visits to Italian districts or Italian main exhibitions, official participation in foreign fairs and exhibitions, forums and seminars with Italian experts and a variety of many other initiatives included in its Promotional Activities Annual Plan, focused on intensifying business opportunities and promote the image of "Made in Italy" all over the world.

ITA helps to develop, facilitate and promote Italian economic and trade relations with foreign countries, focusing on the needs of SME and their entrepreneurs associations. ITA supports Italian firms in their internationalization process and promotes worldwide the marketing of Italian goods and services and Investments in Italy.

FEDERAZIONE ANIE

Federazione ANIE is a Confindustria member representing the Electrical Engineering and Electronic Manufacturing companies operating in Italy. ANIE is an active and recognized interlocutor of the stakeholders who influences framework policies in Italy and abroad and offers to Member Companies a platform where they can confront with a whole community of industries.

ANIE, with over 1,200 member companies, represents the following Industry sectors:

Power Production including Photovoltaic technologies, Power Transmission and Power Distribution, Electrified Transports, Lift and Escalators, Lighting, Cables, Components and Devices for electrical installations, Household Appliances and Catering Equipment, Electronic Components, Factory and Process Automation, Security, Fire Safety and Building Automation, Motion and Power Transmission Systems.

ANIE industry in figures for 2014:

55 billions € of total turnover

30 billions € of export (55,2% on total turnover)

410,000 employees

ASSOCIAZIONE NAZIONALE PRODUTTORI ILLUMINAZIONI

ASSIL

ASSIL, Italian Association of Lighting Manufacturers, member of ANIE, is influential and qualified spokesperson at national and international level of lighting industry operating on the Italian market. It includes around 80 manufacturers of luminaires, electrical components for lighting, light sources and LED. With an annual turnover of 2,5 billion Euros, ASSIL represents over the 60% of the Italian Lighting market turnover and more than 8.000 employees.

Objectives of the Association are representing, protecting and supporting member Companies. These targets are achieved by giving technical support to promote good lighting practice. The purpose is to enhance the quality and performance of lighting products placed on the market, respecting individuals' visual comfort, energy efficiency requirements and environmental safeguard, as well as creating business opportunities for these products.

THE ITALIAN LIGHTENING TECHNOLOGY EXHIBITION

“LIGHT IS LIFE”

The dictionary defines light as “a beam of electromagnetic radiation visible to the human eye” but in reality, it is so much more. Light and the technologies connected to it are the foundation of our very existence. Life as we know it would be very different without electric light, yet we rarely consider the centuries of research behind, and power of, a simple light switch.

In recognition of 2015, The International Year of Light and Light-based Technologies, the ITA-Italian Trade Agency in co-operation with ANIE Federation welcomes you to “Light is Life” – an exhibition that highlights the way illumination technologies make life valuable, satisfying and full of possibility.

Light is Life will take you on an unforgettable intellectual and emotional journey as you step into a world shining with wonder. Make your way from the calm quiet of the exhibition’s dark center into a forest of light bulbs. Stop to observe the spheres of human existence that make life worth living and discover the fundamental part that light technologies play. Move on to the tenth stop where Italy’s worldwide excellence in the lighting industry takes the spotlight. And finally, become part of the exhibition by sharing what light and life mean to you.

Light is Life is a celebration of ideas, human genius and scientific innovation. It’s a voyage that is filled with profoundness, emotional peaks, innovation and amazement. It’s an enlightening exhibition that’s not to be missed.

Project development and complete lighting systems realization. Injection moulds design and manufacture

COMPANY PROFILE

Futura Progetti S.r.l., company that was founded in 2010, which is specialized in project development and realization of complete lighting systems, works side by side with Futura Stampi S.r.l.

Futura Stampi S.r.l. is a leader company for the design and manufacture of injection moulds for technopolymers. Our companies pay particular attention to energy saving, installing new last generation LED lighting fittings.

Our goal is to explain and to show new generation lighting saving energy systems, from the source (the sun), to the means of application (the LED light-ing fittings) installing solar panel systems.

We help our customers to realize their ideas offering them complete turnkey projects.

We focus on companies that need to rebuild, modernize their production plants with a full lighting system and at the same time reduce their costs, save energy and environmental impact which nowadays has a heavy significance.

Led lighting for indoor and outdoor , lighting profiles for indoor , technical lighting for shop and food

COMPANY PROFILE:

INTELLIGENT LIGHT FORMS

“Intelligent light forms” is the slogan part of our logo. Lighting is an element that plays a fundamental role in shops, several studies reveal how it affects the purchasing process. Therefore, our choice of light must adopt a smart strategy and use the right products according to the correct color temperature and other factors that have the power to enhance foods and textures. We fit perfectly in this context, as our main target market is retail, including the production of outdoor lighting fixtures in completion of project requirements. “Food” and “Shop” are the focus of our attention, and we boast prestigious customers, with over 50% of our sales volume coming from important and recognized brands.
