

## **CAPIEL Presentation at the CEMEP Conference in Wernigerode**

Speaker: Karl Hiereth, Siemens AG Amberg

September 14<sup>th</sup>, 2018

The following items will be addressed during the presentation:

### CAPIEL-Organization and some interesting topics

- Functional safety  
PG5 is working for the right definition of safety components and influencing the new machinery directive accordingly.
- WEEE (Product list)  
PG2 interpretation of the new WEEE directive and the discussion about what is in the scope of that.
- MSSI  
Information about the PG3 activities concerning the “market surveillance support initiative”

### Eco-design Lot 30 (PG1)

- MoU CAPIEL/CEMEP  
A common sight on the use of different motor controls was agreed and is described in the MoU.
- Planned common Brochure  
The decided common brochure will give detailed application advises and will explain the future Lot30 regulation. That most expected eco-design regulation needs to be presented and explained to the customers and manufacturers of motor systems.
- Lot30 implementing measure  
A first draft of the final Lot30 is expected to be published in July 2018.

### Product Data/Industry 4.0 (PG8)

- IEC 62683  
Gives a methodology for presenting the product data of switchgear and control-gear products.
- eCI@ss
- DKE K1000  
Some common subjects in the motor systems, like product data, are dealt with in small working groups, to elaborate a common understanding between motors, VSD's and starters.
