ICE - ITALIAN TRADE AGENCY

The ICE - Italian Trade Agency is the government organisation which promotes the internationalisation of the Italian companies, in line with the strategies of the Ministry for Economic Development and Ministry of Foreign Affairs. ICE provides information, support and advice to Italian and foreign companies. In addition to its Rome headquarters, ICE operates worldwide from a large network of Trade Promotion Offices linked to Italian embassies and consulates and working closely with local authorities and businesses.

The principal function of our offices is to foster bilateral trade relations by providing Indian entrepreneurs and companies with information on Italian products, companies & market updates. We also provide assistance in establishing contacts with Italian companies by participating in exhibitions, promoting Italian products, organizing training courses, technological conferences, workshops, seminars, arranging media-advertising campaigns, etc. In addition, we organize a variety of industry-specific promotional events such as trade missions of Indian businessmen to Italy visiting major exhibitions, bringing delegations of Italian businessmen in India and arranging bilateral meetings for mutual benefits. The Italian Trade Agency in India was established in 1969 and we are present with two offices in New Delhi and Mumbai.

PARTICIPATING COMPANIES

ASEM is now one of the European emerging companies in the industrial automation market, providing systems and solutions entirely designed, engineered and produced in its own facilities in Italy.

With over 30 years of experience in Industrial PC design and manufacturing, ASEM is a reliable and professional partner able to provide customers with latest generation HMI, control and remote assistance solutions for the Industrial Automation market, developing and producing "Open & Standard" hardware platforms integrated with innovative, flexible and easy-to-use software.

ASEM has its own complete hardware, firmware, software, mechanics and system design capability and manages internally all production phases, including board assembly and welding.

The full control of design and production processes and the close cooperation with technology trendsetters allow ASEM to ensure a 7/10 years life cycle of its systems and their reparability for at least 5 further years.

BREVETTI STENDALTO S.P.A.

Brevetti Stendalto was born in the early '70s. To date, Brevetti Stendalto has 40 years of experience in protecting and handling cables and pipes with high performance energy chains. Over the years, research, studies and product developments have enabled the creation of innovative energy chains, able to deal with old and new problems in the various sectors in which they are applied. Our excellent chains are well known by the major sectors: Automation, Offshore, Port Area, Waste disposal, Drilling, Airports and raw material processing. Brevetti Stendalto offers to customers a fully wired chain system of cables and connectors, called TOTAL CHAIN, ready to be installed. TOTAL CHAIN has multiple advantages including less waste of time in the on-site assembly and in the preparation of the chain, as the cables, which are of our production as well, are already inserted in it. Brevetti Stendalto is present in Europe (Italy, France and Germany), in China (Shanghai) and USA (Charlotte) and has a widespread network of partnerships throughout the globe.

DATALOGIC AUTOMATION S.R.L.

Datalogic is a global leader in the Automatic Data Capture and Industrial Automation markets. As a world-class producer of bar code readers, mobile computers, sensors, machine vision and laser marking systems, Datalogic offers innovative solutions for a full range of applications in the retail, transportation & logistics, manufacturing and healthcare industries. With products used in over a third of world's supermarkets and points of sale, airports, shipping and postal services, Datalogic is in a unique position to deliver solutions that make life easier and more efficient for people. With an unrivaled dedication to exceeding customer expectations, Datalogic is a total solutions provider that manufactures the widest range of high-performance products and solutions in the industry. Companies around the world trust Datalogic to provide reliable solutions that drive real benefits to their bottom line.

Datalogic Industrial Automation has the most comprehensive offering of products and solutions for traceability, inspection and detection applications in factory automation and logistics processes: industrial laser scanners, cameras and vision systems, sensors, machine safety devices and laser markers.

Italtronic: enclosures for electronic

Success is not a target but a consequence. The present relevant position Italtronic has reached in the field of manufacturers of professional enclosures for electronics is due to the attention given to the research of different solutions to the needs of the manufacturers of electronic and electrical devices.

Italtronic is able to offer innovative proposals, a modern and exclusive design, deep knowledge in the plastic material, moulds and injection. The well known force points of Italtronic are the large standard products ranges which can satisfy the most qualified needs in the field of wall mounting panels enclosures or DIN rail enclosures, the products range by segment and the capability of leading the customer from the first idea to the finished product for special product by customer.

REER S.P.A.

REER: A LEADER IN THE SAFETY AND AUTOMATION INDUSTRY

If safety in the workplace is essential, it becomes crucial in highly automated environments. Thanks to the experience achieved by cooperating with the world leading companies in the machine-tools, automotive, packaging and palletisation industries, Reer is able to offer a wide range of safety devices, such as: light curtains, programmable controllers, photocells, laser scanners and interfaces able to meet each application demand.

SAFETY LIGHT CURTAINS

Reer offers a complete range of Type 2 and Type 4 safety light curtains with resolution from 14 mm to 90 mm and all the relevant access control solutions. Point-to-point and retroreflector-fitted systems with operating range up to 80 meters are also available.

SAFETY CONTROLLERS AND INTERFACES

The SIL 3 Mosaic safety controllers offer modular, expandable and software-configurable solutions to protect machines and dangerous plants. Furthermore, Reer offers a wide range of safety relays and safety interfaces.
