The Italian Green Workshop

Renewable energy development and Italian clean technologies

AGENDA

10:45 - 11:00 **Registration**

11:00 - 11:15 **Opening remarks**

Ferdinando Fiore, *Director of Italian Trade Commission Dubai*
Francesco Starace, *CEO Enel Green Power*

Session chairman: Giuliano Monizza, Confindustria ANIE Vice President for Europe, Energy and Market Strategies

11:15 - 11:50 **Overview session**

The European Union Targets 20-20-20. The Italian Industry portfolio focus on energy efficiency, CO₂ reduction, renewable energies and smart grids

Giuliano Monizza, *Confindustria ANIE Vice President for Europe, Energy and Market Strategies*

A snapshot of the Italian cleantech sector and the supply chain development
Alberto Pela, *GSE*

Research at RSE on Solar Energy for Electricity and Cooling
Luigi Mazzocchi, *RSE*

11:50 - 13:00 **The Italian experience**

The EPC contractor role, for an investment that shines like the sun
Giovanni Ravano, *Ravano Green Power*

Project Oasis: make the desert bloom
Francesco Mari, *Mari Serre*

Sludge dewatering and recycling
Fulvio Boaglio, *Intereco*

Zero Emission Urban Solutions - Video
Faisal Syed, *Nidec ASI*

Case history: overview of a hydro-energy company experience in the UAE
Giovanni Faggiolati, *Faggiolati Pumps*

Closing remarks

H.E. Giorgio Starace, *Ambassador of Italy to the UAE*

The Italian Trade Commission ICE in collaboration with GSE Gestore dei Servizi Energetici - Corrente project and Confindustria ANIE - the Italian Federation representing the electrotechnical and electronic companies operating in Italy - presents **The Italian Green Workshop: renewable energy development and Italian clean technologies.**

Today the Italian industry can already provide concrete answers to energy market challenges.

The Italian industry has developed a wide range of technological solutions to rapidly support progress towards a smarter and more sustainable growth.

The workshop will present the most important Italian technologies developed in field of renewable energy and it seeks to identify the main investment and collaboration opportunities with the United Arab Emirates and the Gulf Area.

The initiative aims to describe the Italian renewable energy sector growth under European Union 20-20-20 targets and the main clean-tech technologies in order to foster partnerships, joint ventures and R&D collaborations between Italian and international counterparts. Energy and water are closely linked: presentations will also outline the development in field of water technologies.
