WELCOME REMARKS BY THE AMBASSADOR OF ITALY TO THE UAE H.E. NICOLA LENER

Embassy of Italy
Abu Dhabi

The Made in Italy is present again at Middle East Energy 2020 edition, with a 600 sqm Pavilion hosting 43 exhibiting companies, organized by ANIE Confindustria, the Italian Federation of electrical and electronic industries, in collaboration with the Italian Trade Agency.

Middle East Energy is the region's leading trade fair for the electricity sector and a showcase of new technologies and innovative solutions where manufacturers and suppliers are the leading figures.

In the last few years, the countries in the region have taken decisive steps toward a diversified energy landscape by pursuing a broader energy mix, while implementing several projects to achieve ambitious targets of energy efficiency. The GCC's new vision will soon require massive investment in renewables and green power generation, transmission and distribution to cope with increasing demand from a rapidly growing population, urbanization, rising income levels and industrialization.

In this framework, Middle East Energy represents a formidable opportunity for international companies to get in touch with the Italian technology in the whole value chain of electric and electronic industries. Thanks to a continuous push to innovation and the capability of customization of products and solutions, the Italian companies in this sector are indeed among the most competitive in the market.

I therefore hope that Middle East Energy 2020 will be a great occasion for visitors and industry professionals alike to experience and appreciate the high value and degree of specialization of Italian technology in this important industry.

Nicola Lener

Ambassador of Italy to the UAE

LETTER FROM THE ANIE VICE PRESIDENT FOR INTERNATIONALIZATION

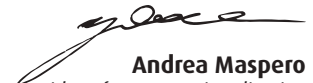

The United Arab Emirates play a leading role in the internationalization strategies of Italian companies. First destination market for Italian Electrical Engineering and Electronic Industry in the Middle East, UAE represent a share close to 25% of the total export to the area.

The United Arab Emirates continue to be characterized by a significant infrastructure development and an high attention to the use of innovative technologies. Energy, Construction, Industry and Transportation are the driving sectors of this renewal program, also in light of the growing level of economic diversification.

Federazione ANIE - the Italian Association representing the Electrical Engineering and Electronic Industry - strongly supports in collaboration with the Italian Trade Agency the Italian official participation to the 2020 edition of Middle East Energy, as an important showcase for the technological excellence of the Italian industry.

This is a time of extraordinary opportunities for our companies in the world as, over the coming decade, technological innovation will create change at a pace never seen before. Technologies are a fundamental and growing part of the global transformation led by digitalization, energy transition, climate friendly production and sustainable mobility.

The call for smarter and cleaner solutions is getting louder. Our industry will play a pivotal role in responding to these challenges and shaping a future renewed by technology. Italy is characterized by an ecosystem of innovative and pioneering small and medium-sized enterprises that could boost this path on the global stage.

Andrea Maspero
ANIE Vice President for Internationalization

AB TRASMISSIONI, established in 1975 with the name AB BALBONI, is a solid family-managed company, which has always paid close attention to customer's needs and constantly strives for improvement. From the beginning, it has been designing and manufacturing solutions for power transmission, such as elastic and rigid couplings, centrifugal pulleys and so on. We cover several application fields: mechanical transmissions in general, engine applications, agriculture, irrigation, building industry etc... Thanks to more than 40 years' experience in the field of industrial diesel engine, AB TRASMISSIONI offers technology, Know-how, innovation and quality accessories for equipping engines and a wide range of electrical devices and components to be applied to machineries and industrial installations, paying particular attention to pumps and Generators.

We produce also heating systems for diesel engine, solenoids, valves and the innovative NEW Emergency Push button for Gen Sets.

Products:

solenoids, electric pistons, electric valves, heaters, digital LED-bar instruments, digital instruments current transformers, isolation control.

Made in Italy quality and design for wiring devices

FEB - Factory of Electrical devices in Bologna - is an historical Italian company working in the electrical field in Bologna since 1947. FEB is very well known for its home automation products and its series of wiring devices. Our products show the traditional Italian aesthetics and design. Their safety and quality, which are guaranteed by the international product certifications and by the UNI EN ISO 9001:2015 certificate, allow FEB to give 5 years of warranty on the products.

Home automation systems for residential and business applications

Products:

wiring devices for residential installations, home automation systems, nurse call systems, transformers, doorbells, IP40 and IP55 wall boxes.

FHT: high-temperature AGM VRLA products

LM: traditional flooded cell with tubular plate

FIAMM ENERGY TECHNOLOGY is a world leader in energy backup and storage solutions. The company offers a broad range of lead-acid batteries, designed to guarantee uninterrupted power supply in many applications. In order to meet specific requirements, FIAMM brings different technologies to the market, from VRLA to flooded solutions.

Products:

- › AGM VRLA, gel VRLA and flooded batteries suitable for different applications: utilities and industry, telecom, UPS, oil & gas, security systems, railways, renewable energy, leisure;
- › energy storage solutions suitable for different residential applications thanks to modular capacities and system voltages;
- › battery cabinets, racks and other accessories.

METH designs and manufactures LV Electric Transformers since 1980 focusing on the quality of its product performance, thanks to 30 years of experience in this business. METH is specialized in manufacturing single-phase transformers from 3,2 VA to 80 kVA, three-phase transformers from 100 VA to 1000 kVA, three-phase auto-transformers and three-phase filter and smoothing reactors. Since 1998 multiple national and international certifications have been the results of a continuous effort in updating the products to meet worldwide standards and requirements, such as UL, KEMA and ENEC. In 2016 METH achieved the certification SASO-SABER to export in a new market: Saudi Arabia and improved UL certification for Three Phase Industrial Control Transformers, approved up to 80 kVA of nominal power in class H and Three Phase Autotransformers, approved up to 345 Amps in class H. METH experience and technology allow to develop and manufacture in a short time new products to meet any customers requests and to improve new products programs.

Products:

low-voltage single-phase isolating and safety transformers, single-phase transformers for medical locations, PCB transformers, low-voltage three-phase transformers with protection degree: IP00, IP21, IP23, IP54, IP55, low-losses three-phase slim-line transformers eco-design, three-phase autotransformers, three-phase filter reactors, three-phase smoothing reactors.
