# LETTER FROM THE AMBASSADOR OF ITALY TO THE UAE

Italian Embassy  
United Arab Emirates

With high safety, efficiency, quality and environmental compatibility standards, the products and services of Italian electrotechnical and electronic manufacturers fulfill today's global requirements, even under demanding geographical conditions. Customers can expect reliable, target-oriented and custom-tailored solutions, and a high rate of innovation.

Visiting the Italian Pavillion at Middle East Electricity and Solar Middle East 2013 will represent an excellent opportunity to create business relations and new commercial and industrial openings, between local partners and reliable Italian exhibitors; it is also an ideal platform for the dialogue of companies with their partners from Dubai, from the entire UAE, as well as from other GCC countries: with the increasing demand connected with the need for energy of Middle Eastern and Africa Countries, this Fair is the ideal showcase in the entire region for all the Italian companies of the electrotechnical and electronic sector.

Moreover, the exploitation and development of renewable energies are among the fundamental themes of modern society, taking into account the environmental and socio-economic implications.

These exhibitions want precisely to highlight, among international trading and institutional operators, the Italian potential in developing the industry. The ultimate goal is to set up both international co-operation aimed at increasing long-term competitiveness of Italian firms, and to draw the attention of foreign investors to our country.

As a matter of fact, the Italian Trade Commission, Trade Promotion Section of the Italian Embassy, in co-operation with Federazione ANIE and under the auspices of the Embassy of Italy to the UAE, supports this year the official Italian participation to the 38th year edition of Middle East Electricity and Solar Middle East, the largest power & electricity exhibition in the entire region, which will take place from February 17th to 19th at the Dubai International Exhibition Centre.

Giorgio Starace  
Ambassador of Italy to the UAE

## ITALIAN TRADE COMMISSION

The Italian Trade Commission is the agency for the support of the internationalization of Italian firms, an Italian Governmental body, operating under the directions of the Ministry of Economic Development, the Ministry of Foreign Affairs as well as the Ministry of Economy and Finance.

The Agency is entrusted with the task of developing, facilitating and promoting Italian economic and trade relations with foreign countries, focusing on the needs of SME, their associations and partnerships.

ITC works to assist Italian firms in their internationalization processes and promotes marketing of Italian goods and services at a worldwide level, supporting as well the image of "Made in Italy" products in the world.

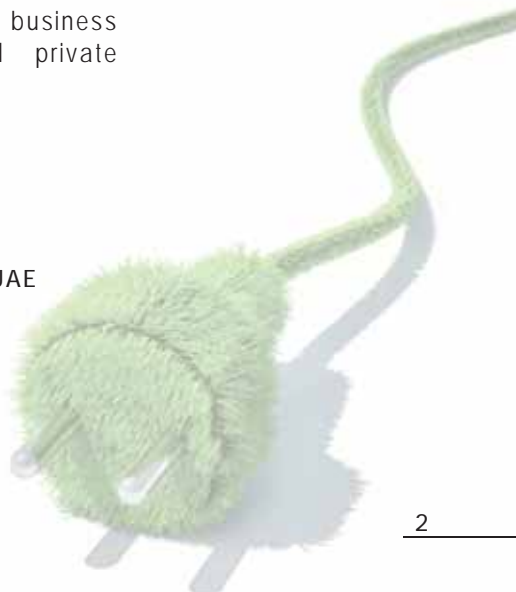

In carrying out its activities, the Agency works closely with the Italian Regions, the network of the Italian Chambers of commerce, business organizations and other public and private entities.

for industrial & electronic  
applications

## E.T.A. Spa

Established in 1978 in Italy, E.T.A. is one of the most prominent manufacturers of innovative high-quality empty enclosure solutions for Industrial and Electronic applications, for Industrial automation and LV Energy distribution. Leading investor in R&D, E.T.A. consists of three manufacturing sites, two subsidiaries located abroad (UK and France) and a wide network of distributors in more than 40 Countries. Considered as a key player in the processing of sheet metal, stainless steel and extruded aluminium, our wide product range is including suite, modular and monobloc cabinets, wall-mounting and terminal boxes, control desks, outdoor solutions, EMC, rack 19" and customised solutions.

### Products:

E NUX Suite cabinet system, both mild steel and stainless steel

STX Stainless steel wall-mounting boxes

ST Mild steel wall-mounting boxes

## EL.CO. Srl

The EL.CO. company opened its doors in 1986, developing its production of solid state relays of various power ratings, timers and protection relays, interfaces and analog and digital temperature controllers. All products are CE certified and the static relays have also acquired the VDE and UL / CSA marks.

The company also has adequate production equipment acquired in harmony with the development of the sector. In many years of experience, the company EL.CO. includes primary customers and is present on the national and international market.

### Products:

SMB170 - SMB171 series step solid state relays (bistable)

ELTH17 / ELTH35 series digital electronic temperature controller

## ELETTROCANALI Spa

ELETTROCANALI was founded at the end of 70's and has 4 manufacturing sites all located in Italy. ELETTROCANALI exports in more than 40 countries all over the world and has been ISO 9001 certified since 1998, but the quality is strongly and constantly pursued also by obtaining several patents which guarantee the functionality and safety of the products. ELETTROCANALI produces and distributes over 3200 articles for the installation and the protection of low tension equipments: cable trunking systems, slotted trunkings, industrial plugs and sockets, empty and assembled distribution boards, cable reels, modular distribution enclosures, junction boxes, rigid, pliable and flexible conduits and accessories, residential series.

### Products:

Trunking systems

Modular enclosures and junction boxes

Conduits and fittings

## FEAM Srl

Founded in 1961, FEAM srl is a market leading manufacturer of explosion proof electrical equipment for Oil & Gas industry. FEAM is present in the global market and sales are generated in more than 45 countries. Certified ISO 9001:2008, FEAM srl is present in the Vendor List of major EPC and Owner like Saudi Aramco, Saipem, KOC, KNPC, SABIC, ADKO, ADNOC, PDO, GASCO, TR, Petrofac, Shell, etc. Applications in zone 1/21 and 2/22 gas (IIB and IIC) and dusts. The range is certified according to ATEX, IEC-EX, GOST-R, GOST-K, Inmetro. The branch office is located in Jebel Ali free zone and a small stock is available.

### Products:

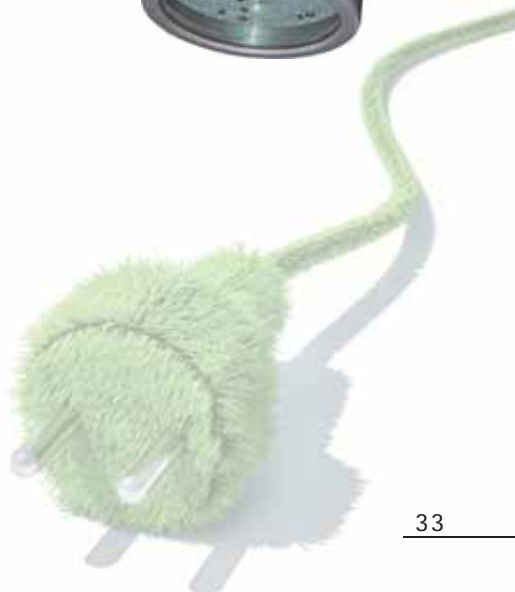

- Explosion proof electrical equipment
- Distribution boards, Control Panel. Switchracks
- Lighting fixtures
- Cable glands
- Local control station
- Push button
- Sockets and plugs
- Earthing systems

## NUOVA ELETROFER Spa

The Coppo group built in the early sixties, is a specialized manufacturing company for metal structures. In 1974, Coppo Group acquired Eletrofer, a company based in Serravalle characterized by over 20 years of experience in cutting and assembling rotor and stator for electrical motors and cores for power and distribution transformers. Nowadays Nuova Eletrofer has different production plants located in Argentina, China, Bulgaria, Spain besides Italy.

### Products:

Power and distribution Cores

C and toroidal cores

Rotor and stator for Electric Motors

## O.M.E.M Spa

Founded in 1949, OMEM means quality and custom satisfaction. Producer of machines before, actually manufacturer of wound cores, OMEM can satisfy all needs of their faithful customers thanks to its flexibility, reactivity, inventive technical competences and thanks to the continues engineering investments, OMEM exports 70-80% of their products all around the world. Cores are made in FeSi 0.30 M5-M0, M4 0.27, G.O.S.S. 0.05, 0.10; FeNi (Mumetal) 0.20, 0.10 and nanocrystalline alloy.

### Products:

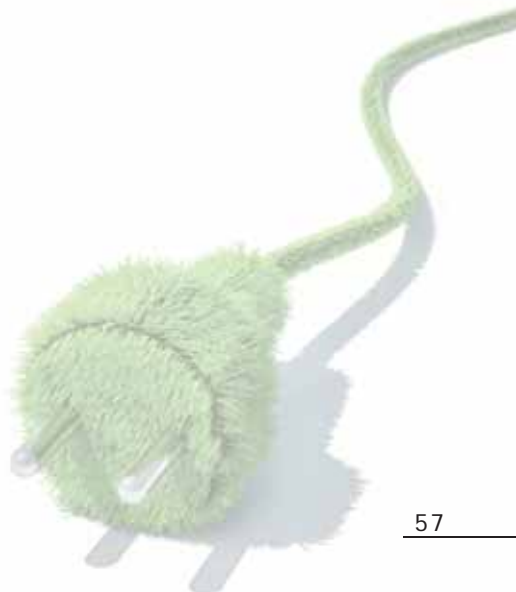

Magnetic wound cores FeSi and FeNi  
Nanocrystalline and amorphous cores

## OREFICE Srl

# OREFICE<sup>®</sup>

gruppi elettrogeni

Orefice Gruppi Eettrogeni was founded in 1938 and produces generating sets from 3 up to 3000kVA. The Orefice generators are designed for many applications, with special attention to the professional and heavy duty applications. Orefice Gruppi Eettrogeni complies with CE regulations and 2000/14. The quality is certificate ISO9001. Over the standard products, Orefice can design generators by customer specifics. Our production system allows us to realise a quality product and in the meantime to place great importance on the quality of the work environment.

# ALTATENSIONE

## Pan International Srl

**PAN**  
*Sibilla*  
**altatensione**

PAN INTERNATIONAL was founded in 1987 and it is located in FLORENCE, ITALY. Through its 3 different brands PAN, SIBILLA Led and ALTATENSIONE, it is capable of meeting all lighting technology needs. ALTATENSIONE dedicates important resources to R&D, it is able to offer architectural lighting solutions designing all its lighting products in-house with unmatched reliability. A qualified and dynamic staff will support you for the development and realization of any lighting projects, to be a reliable Italian partner. PAN- ALTATENSIONE thanks to 25 successful years in Italian market, now intends to develop EXPORT BUSINESS offering innovation, service and quality.

### Products:

Architectural led equipments and fittings  
Led commercial light fixtures  
Decorative light fixtures for outdoor an indoor

## SELTA Spa

Since its foundation SELTA has realized automation and control systems and transmission technologies for public utilities networks.

SELTA operates internationally, offering flexible and efficient solutions for the transmission and distribution of electricity, power, water and gas.

System architectures designed by SELTA are compliant with the international standards, thus keeping a full fitting with the already existing networks. This key strength ensures continuity and maximum reliability for the user's services.

### Products:

Remote control and monitoring systems for electric transport and distribution networks.

Local automation of electric substations systems.

Private telecommunications networks, power line carrier systems.

## TAPPI STAMPATI Srl

Since 1972 we have been designing and manufacturing, entirely in Italy at competitive prices, caps, level gauges and loading systems for fuel, lubricants and auxiliary liquids tanks, used in many sectors: agricultural and industrial machines, generating sets, oil-hydraulic equipment, motorcycles, ultralight aircrafts, boats, trains, etc.

The experience acquired and the continuous research of technical innovations, as well as quality and reliability of our products, have made us a leader in our field.

We can also manage to reduce costs supplying complete loading systems already assembled with niche, cap, pipe and filter. Our aim is to give support finding the best solutions for our customers' needs

### Products:

Caps

Visual level indicators

Complete loading systems

 **THYTRONIC**

## THYTRONIC Spa

Thytronic Spa is a company specialized in developing and manufacturing Protection & Control solutions needed for electrical power generation and distribution. We provide single and multifunction digital protective relays suitable for wide range of application, from the generation to the distribution of electric power. Thytronic protective relays are designed for the selective protection of generators, overhead and cable feeders, capacitor banks & harmonic filters, motors, transformers and busbars in power system distribution, substations, power plants, industrial power system and offshore installation. Indoor Earth Fault Indicators (EFI) for secondary distribution system complete our offer. Competitive products, customized service, rapid delivery and the attentive evaluation of the customer needs have all contributed in making us one of the best and reliable independent manufacturer of protection relays.
